

April Fool's LED's

References:

Radio Electronics, p 108, October, 1980
O Gauge Railroad, p 53, August, 1996

Description:

\$10 of goodies will build an alternating flasher, that on a good day, will fool the best. Flasher L.E.D.'s look just like the regular ones. Keep the leads short and use humongous size caps, like the ones found in Jameco Jim-Paks
